GENERAL SAFETY WARNINGS

- Read this instructions carefully before using your oil radiator for the first time and keep it for future enquires.
- Keep all plastic bags and packaging components out of the reach of children. They are potentially dangerous.
- Do not connect the appliance to the mains without checking that the voltage on the rating plate and that of your household are the same.
- Ensure the plug has an adequate earth base.
- Do not use the radiator in bathrooms or near bath tubs, showers, sinks or swimming pools.
- Do not use the radiator to dry washing, do not rest the power able on hot elements.
- Always use the radiator in the vertical position.
- The appliance must be positioned at least 50 cm from furniture or other objects.
- If the power cable is damaged, it must be replaced by an authorised service centre or a qualified electrician in order to eliminate all risk.
- Do not use this appliance in rooms measuring less than 4m².
- Do not cover the appliance when in operation.
- This appliance may be used by children 8 years of age or older and reduced physical, sensory or mental persons or lack of experience or knowledge if they have been given appropriate supervision or training in the use of the appliance in a safe manner and understand the hazards implying.
- Children should not play with this appliance.
- The cleaning and maintenance to be carried out by the user should not be carried out by children without supervision.
- Do not use this oil radiator with a programmer, timer or other device that automatically switches on the heating device, as there is a risk of fire if the heating appliance is covered or incorrectly positioned.

WARNING: In order to avoid overheating, never under any circumstances cover the appliances during operation.

COMPONENTS IDENTIFICATION

Please read this instruction manual carefully and familiarize yourself with your new oil radiator. Before using the first time, please retain this manual for future reference

1. Power switch
2. Thermostat knob
3. Handle
4. Oil filled fins
5. Castors
6. Cord storage
7. Cable

ATTACHING THE FEET

Remove the heater and all the accessories from the carton.

1. Turn the heater upside down.
2. Position the wheel base assemblies between the end fins.
3. Attach them to the heater using the U-bolts and wing nuts supplied.
4. Tighten the wing nuts.
5. Turn the heater the right way up.

TECHNICAL DATA

Model : OIL RADIATOR (SVCA07RA)
Rated voltage : 220-240V; 50Hz
Power : 1500 W
3 Power outputs setting
Adjustable thermostat with overheat protection

Model : OIL RADIATOR (SVCA09RA)
Rated voltage : 220-240V; 50Hz
Power : 2000 W
3 Power outputs setting
Adjustable thermostat with overheat protection

Model : OIL RADIATOR (SVCA11RA)
Rated voltage : 220-240V; 50Hz
Power : 2500 W
3 Power outputs setting
Adjustable thermostat with overheat protection

OPERATION AND USE

Turning on

Plugs into the mains. Turn the thermostat as far as it will go to maximum position. Turn the radiator on using the switch or switches.

Buttons (3 power levels)

- Button "I" pressed = minimum power (indicator light on)
- Button "II" pressed = intermediate power (indicator light on)
- Buttons "I" and "II" pressed = maximum power (indicator lights on)

To turn the appliance off, both switches must be in the "0" position , then unplug from the mains .

Adjusting the thermostat

When the room has reached the required temperature, turn the thermostat slowly until a "click" is heard and no further. This temperature will be regulated automatically and kept constant by the thermostat.

MAINTENANCE

The oil-filled electric radiator requires no special maintenance. It is sufficient to remove dust with a soft dry cloth; clean when cold only. Do not use abrasive powders or solvents. If necessary, remove accumulations of dirt using a vacuum cleaner.

RECYCLING PRODUCTS

Electrical products should not be disposed of with household waste. Please recycle in special disposal centers provided for this purpose. Contact your local authorities for advice on recycling

Separate collection of used products and packaging allows materials recycling and reuse. Reuse of recycled materials helps prevent environmental pollution and reduces the demand for raw materials.
